established a reliable means of communication with one-another and determined roles, which may be open to restructuring later in the project.
The requirements documentation was started and the github team was created for all members to begin contributing information and ideas.
Luckily the risk of having an incompatible team seems to have been avoided as all parties are amenable to each other's schedule restrictions, to
a degree, and all team members have managed to remain polite and professional. This iteration was necessary to form the ground work for the
